

ATEX Design & Manufacture

Over several years Datalink has established itself as an expert in the design and manufacture of electronics for use in potentially explosive atmospheres (ATEX).

The electronics design team has developed a host of ATEX-certified products for use in applications such as process monitoring, data acquisition, high-speed data transmission, and vibration monitoring.

Knowledge of the various protection methods and standards (e.g. intrinsic safety, encapsulation, flame proof enclosure), the Datalink design team has abundant skills and experience in the design of embedded electronic circuits.

- In-House Design Consultancy
- Highly Qualified Design Engineers
- Support for ATEX Electronic Design Certification
- We offer a Full Turn-Key Solution
- Manufacture small-to-medium volumes
- Accredited to ISO9001 standard
- Product testing to ensure 100% functionality
- Product compliance of regulatory standards (ATEX, EMC, LVD, etc)
